

HORIZONTAL JUNCTION ANGLE BRACKET FOR ALUMINIUM JOIST H27 MM AND LATERAL FINISHING H55

BENEFITS

- Pre-drilled: for easy screwing.
- One product for 2 uses.

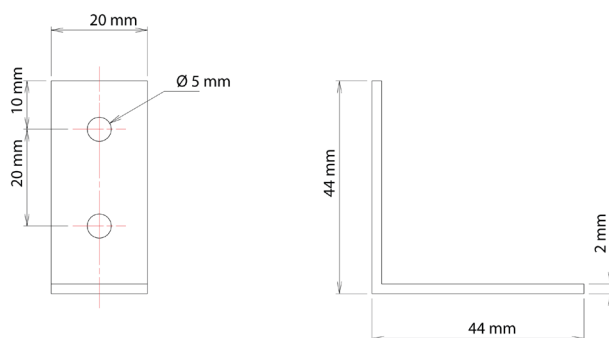

APPLICATIONS

- Can be used to create a 90° angle.
- For reinforcing 90° joints with H27 aluminium joist.
- Allows the side finishing (decking side) with H55 aluminium joist.

RECOMMENDATIONS

- Terraces and patios for pedestrian use only.
- Outdoor use only.
- For an easier installation, place the bracket between the outer low rail of the aluminium joist.
- For use only with products in the PROFILDECK® range.
- To be used with the Profildeck® structure screws.
- For IFU, see the website.
